

1. Having the following code, create some unit tests for the Average method and fix the bugs:

```
0 references
class MathUtils
{
    1 reference
    public static double Average(int a, int b)
    {
        return a + b / 2;
    }
    0 references
    public static void Main(string[] args)
    {
        Console.WriteLine(Average(2, 1));
    }
}
```

2. Create at least 2 tests for the method that verify if a phrase is a pangram, from Set1-C# set Ex01 ex .6
3. Create at least 4 tests for the methods from Set1-C# set EX02 ex.2 and 2 tests for EX02 ex.3.

Optional:

4. Create some unit tests for the method from Set1-C# set ExOp_01 ex.2
